RR ENTERPRISES PLUMB-IT AND THE GUARDIAN™ DRAIN CARE PRODUCTS RECEIVE GREEN SEAL OF APPROVAL

April 13, 2009 – Modesto, CA, USA – Green America recognized RR Enterprises efforts toward preserving the environment by granting them membership in Green America's Green Business Network™ and awarding their Plumb-it Natural Drain Cleaner and The Guardian™ floor drain basket the Green America Seal of Approval. Additionally, their products were added to the coveted National Green Pages™, at Greenpages.org.

To qualify for membership, businesses must first pass a comprehensive review process designed to ensure only companies that are truly committed to environmentally friendly products and socially responsible principles are listed. "We are honored to be listed in the prestigious National Green Pages," said Jim Wray, President of RR Enterprises. We are dedicated to creating drain products that enhance wastewater and are safe to use and safe for the environment."

RR Enterprises product ingredients are kept to a minimum to ensure that the inherent biodegradability of each of the ingredients will continue through to the end product. Their products actually enhance the wastewater, adding beneficial bacteria and increasing the enzymatic breakdown of offensive elements, such as fats, oils and grease that contaminate wastewater causing serious health hazards such as:

- ✓ Sewage overflows resulting in expensive and unpleasant cleanup
- ✓ Possible contact with disease-causing organisms
- ✓ An increase in operation and maintenance costs

RR Enterprises seriously considers the impact of their products on people and the environment and strives to ensure all of their products are:

- ✓ Beneficial to wastewater
- ✓ Will not pollute the water table
- ✓ Is non toxic & non pathogenic
- ✓ Is naturally biodegradable

Green America is a not-for-profit membership organization founded in 1982. Their mission is to harness economic power—the strength of consumers, investors, businesses, and the marketplace—to create a socially just and environmentally sustainable society. For more information, please visit:
